**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 16, 18, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morrison, et al. (6,933,655).

Morrison teaches a device comprising a seatbelt having a buckled state and an unbuckled state (see col. 8, lines 43-46); a self-powered wireless switch assembly 766 coupled to the seatbelt, the self powered wireless switch assembly comprising an energy harvesting element generating electrical power, a capacitor storing power received from the energy harvesting element, and a wireless transmitter transmitting a wireless status signal corresponding to the buckled state and the unbuckled state, see figures 3 and 28. The energy harvesting element comprises a piezoelectric material 202. Morrison teaches a receiver receiving a wireless signal and generated an electrical request signal corresponding to the wireless signal. With respect to a wireless transmitter transmitting a wireless status signal corresponding to the buckled state and the unbuckled state in response to receiving the request signal, Morrison teaches providing a power output in response to receiving a signal. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the signal of Morrison modified to respond to the state the seatbelt, since a mere modification may be made without departing from the scope of the invention. With respect to claim 26, Morrison teaches a transmitter with an identification system may be used.

***Allowable Subject Matter***

3. Claims 1-6, 8-15 and 19-22 are allowed.
4. Claims 17 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claims 16, 18, 24 and 25 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye M. Fleming whose telephone number is (571) 272-6672. The examiner can normally be reached on M-F (9:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (571) 272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
